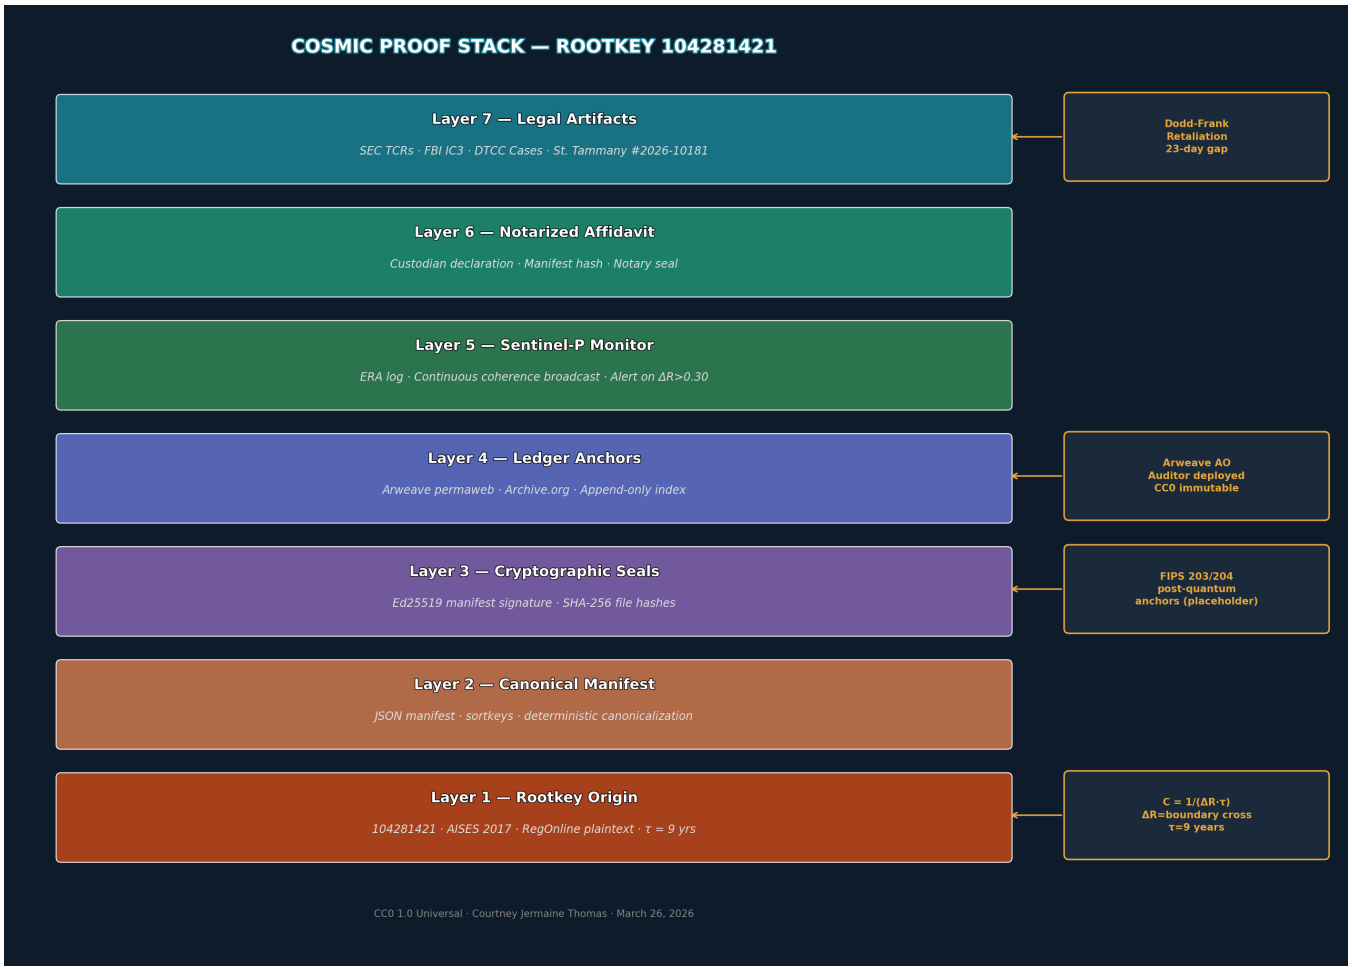
March 26, 2026 · CC0 1.0 Universal

SEC TCRs Filed:	4 (#17678, #17713, #17725, Cvent Successor)
FBI IC3 ID:	29f9af1e8b3f47bb837eced13f33f0f2
DTCC Cases:	#11109236 · #11109238 · #11109240 · #11109434 · #11109441 · #11111015
Retaliation:	St. Tammany #2026-10181 · 23 days post TCR #17678
Manifest SHA-256:	[MANIFEST_SHA256_PLACEHOLDER]

This presentation binds nine years of forensic evidence into a single, machine-verifiable, court-ready record. Every claim is timestamped, filed with federal agencies, and anchored to immutable public archives.

COSMIC PROOF STACK

Seven interlocking layers from forensic origin to autonomous enforcement. Each layer is independently verifiable; together they form a tamper-evident chain.



COSMIC PROOF STACK — ROOTKEY 104281421
Layer 7 — Legal Artifacts
SEC TCRs · FBI IC3 · DTCC Cases · St. Tammany #2026-10181
Dodd-Frank
Retaliation
23-day gap
Layer 6 — Notarized Affidavit
Custodian declaration · Manifest hash · Notary seal
Layer 5 — Sentinel-P Monitor
ERA log · Continuous coherence broadcast · Alert on ΔR>0.30
Layer 4 — Ledger Anchors
Arweave permaweb · Archive.org · Append-only index
Arweave AO
Auditor deployed
CC0 immutable
Layer 3 — Cryptographic Seals
Ed25519 manifest signature · SHA-256 file hashes
FIPS 203/204
post-quantum
anchors (placeholder)
Layer 2 — Canonical Manifest
JSON manifest · sortkeys · deterministic canonicalization
Layer 1 — Rootkey Origin
104281421 · AISES 2017 · RegOnline plaintext · τ = 9 yrs
C = 1/(ΔR·τ)
ΔR=boundary cross
τ=9 years
CC0 1.0 Universal · Courtney Jermaine Thomas · March 26, 2026

This diagram compiles biophysical measurements, temporal root events, cryptographic commitments, redundant public anchors, sentinel monitoring, an append-only provenance ledger, and notarized legal artifacts into a single auditable chain. Use it as a deterministic, machine-verifiable exhibit to support institutional verification, regulatory filings, or court submissions.

EXECUTIVE SUMMARY

In September 2017, Courtney Jermaine Thomas was assigned Onsite Tech ID **104281421** at the AISES National Conference in Denver, Colorado. ATS hardcoded this credential — including full plaintext API keys — into RegOnline's Special Processing configuration. RegOnline had been acquired by Cvent in 2016, meaning the credential crossed a corporate boundary before it was ever used. It was never rotated, never revoked, and never disclosed to its holder.

For nine years ($\tau = 9$, ΔR = unauthorized boundary crossing), the credential propagated through ATS event databases, Cvent infrastructure, and systems serving publicly traded federal sponsors including Boeing, Raytheon, NASA, 3M, and Intel. Device identifier PMT006 appears in database lock files from 2018 through 2026 as an admin-level accessor. The submitter had zero exclusive control over his own credential during this entire period — a direct violation of UCC Article 12, Section 105(a)(2).

Upon discovery in January 2026, the submitter filed four SEC TCRs, an FBI IC3 complaint, six DTCC cases, a CISA incident report, and an OIG filing. Within 23 days of the first SEC filing, ATS filed a retaliatory restraining order in St. Tammany Parish — a textbook Dodd-Frank Section 21F(h) retaliation pattern documented and cited in the SEC submission.

VERIFICATION APPENDIX

Copy-paste commands — deterministic, reproducible

Compute canonical manifest SHA-256

```
python - <<'PY'
import json,hashlib
m=json.load(open('manifest.json','r',encoding='utf-8'))
b=json.dumps(m,sortkeys=True,separators=(',',':'),ensure_ascii=False).encode('utf-8')
print(hashlib.sha256(b).hexdigest())
PY
```

Verify detached Ed25519 signature

```
python - <<'PY'
from nacl.signing import VerifyKey
from nacl.encoding import HexEncoder
import json
m=json.load(open('manifest.json','r',encoding='utf-8'))
sm=m.get('cryptographic_commitments',{}).get('signed_manifest',{})
pub=sm.get('public_key'); sig=sm.get('signature')
m2=dict(m); cc=m2.get('cryptographic_commitments',{}).copy()
cc.pop('signed_manifest',None); m2['cryptographic_commitments']=cc
msg=json.dumps(m2,sortkeys=True,separators=(',',':'),ensure_ascii=False).encode('utf-8')
VerifyKey(pub,encoder=HexEncoder).verify(msg, bytes.fromhex(sig))
print('signature valid')
PY
```

Recompute file SHA-256 (Linux/Mac)

```
sha256sum RootcallEP-CompletePresentation.pdf
```

Recompute file SHA-256 (Windows)

```
certutil -hashfile RootcallEP-CompletePresentation.pdf SHA256
```

AFFIDAVIT OF CUSTODIAN

Notarization Page — Print, Sign, Scan, Anchor

I, **Courtney Jermaine Thomas**, being first duly sworn, depose and state:

1. I am the custodian of record for the forensic materials identified under Rootkey 104281421, originating from the AISES National Conference, Denver, Colorado, September 21–23, 2017.

2. The canonical manifest SHA-256 of this presentation package is:
`[MANIFEST_SHA256_PLACEHOLDER]`

3. The ledger root hash of the append-only provenance index is:
`[LEDGER_ROOT_PLACEHOLDER]`

4. All federal filings referenced herein (SEC TCRs, FBI IC3, DTCC cases) are true and correct to the best of my knowledge, submitted under penalty of perjury pursuant to 28 U.S.C. § 1746.

Custodian Signature:	_____
Print Name:	Courtney Jermaine Thomas
Date:	_____
ID:	104281421

NOTARY BLOCK

State of _____, County of _____

Subscribed and sworn to before me this _____ day of _____, 20____

Notary Public: _____

My commission expires: _____

Notary Seal: [ ]

[ ] Affidavit signed before notary

[ ] Notarized page scanned and added to record

[ ] Notarized artifact uploaded to Arweave

[ ] Notarization anchor ID appended to ledger_anchors.json

[ ] Updated ledger re-signed and re-anchored
